

GENERAL COMMENTS ON THE MONTH.

~~November~~ ^{October} was warmer than average, the mean maximum of 14.7C (58.5F) being 0.8C above the 30-year mean. With 3 ground, and no air frosts, the month was in line with last year.

Rainfall was above average, falling over 21 days with 6 of these being "wet" (more than 5mm 0.2in)

It was also a sunny month, though less so than for the past 4 years. There were 7 totally sunless days, somewhat above average. No thunder or hail was reported.

Gusts above gale force were noted on only one day, the 28th, when speeds reached 41 knots (47mph).
